

Vero Workers Compensation

Cutting the cost of workplace injuries

As many businesses are aware, there can be much more to workers compensation than simply paying insurance premiums.

Hidden costs can stack up once you factor in:

- ▼ loss of production
- ▼ absenteeism
- ▼ increased turnover
- ▼ replacement labour, and
- ▼ retraining.

You can easily expend more than three times the cost of insurance premiums on these hidden costs.

Building a competitive advantage

Vero Workers Compensation's integrated approach to risk and claims management can help you reduce the hidden costs of workplace injuries. This can deliver you a competitive advantage within your industry.

Our practical approach to risk assessment and planning develops actions that are easy to implement and cost effective. Add to this our market leading return to work and claims duration rates, and what you get is less disruption to your business.

Benefit from experience

Vero Workers Compensation has some of the most experienced and qualified people in the workers compensation industry. Our specialist Risk Managers and Claims Managers are dedicated to reducing the total cost of your workplace injuries.

Vero Workers Compensation

Specialist and secure

Vero Workers Compensation is more than simply a specialist. We are backed by the security of one of Australia's largest insurers.

Vero has origins dating back to 1833.
