

2017 Commercial Property Fire Database

The 2017 Commercial Fire Database has been developed to assist our broker partners with a database of known large losses, (greater than AUD\$50,000), in the commercial property insurance market.

Brokers have found the data useful for tenders as well as risk management conversations with their clients. It is Australia's only publicly available database of commercial fire losses.

More detail on this data is available from your Vero contact.

Date	Suburb	State	Occupation
