Holding insurer policy number:

A new table format added to enter prior policy term details:

- Easy inline editing format
- Smarter pre-population of terms

An easier way to enter prior term claims – Cont'd

The screenshot shows the 'Workers Compensation | Policy Details' form. At the top, there is a 'Gross Premium' section with a 'Calculate' button. Below this, a table shows policy details: Quote Ref. IDP020305576, Stage Quote, Status Draft, Term Start 19/11/2018, Term End 19/11/2019, and Effective 19/11/2018. A 'Policy' section has 'No' and 'Yes' buttons. The 'ANZSIC / Wages' section is expanded, showing 'Years insured for Workers Compensation (round to the closest year)' with buttons for 0, 1, 2, 3, and 4+. The '2' button is highlighted in green. Below this is a 'Prior claims (last 4 years)' section with 'No' and 'Yes' buttons. The 'Yes' button is highlighted in green. A green arrow points from the 'Yes' button to the 'Years insured' section. Below this is a 'Prior policy term details' section with a table:

Term start date	Term end date	Wages for term	Number of claims	
19/11/2017	19/11/2018	\$200,000	0	Remove
19/11/2016	19/11/2017	\$200,000	1	Remove

The 'Number of claims' field in the second row is highlighted in green. A green arrow points from this field to the 'Number of claims' field in the 'Years insured' section. Below the table is a section for 'Paid amount', 'Outstanding', 'Recoveries', and 'Report date', each with an input field. At the bottom, there is an 'Add' button and a 'Holding Insurer' section with a dropdown menu set to 'Zurch' and a 'Holding Insurer policy number' input field. The ANZSIC / Wages logo is in the bottom right corner.

Smarter logic added - The number prior terms displayed is based on 'Years insured' value.

In this example:

- 2 terms are defaulted
- Additional claims data is displayed in the 2nd row only if claims are declared

Improved handling of invalid Postcode/Suburb data via Sunrise

Workers Compensation validation improved to align with existing SME Packages functionality
